Higher Education

Fintech Certificate

HEC LIÈGE
Management School - Liège Université

HOUSE OF TRAINING
The Future is Made of Skills

About the Programme

Financial services are being transformed by digitalisation, new technologies and changing customer expectations. The Fintech Certificate prepares professionals to understand, evaluate and integrate innovation, from blockchain & big data to AI in finance. This programme is designed for the Luxembourg financial sector, combining academic rigour from HEC Liège — a double-accredited (EQUIS & AACSB) management school — with the market expertise of the Luxembourg House of Financial Technology (LHoFT). You will learn directly from industry practitioners and engage with startups, investors, and potential clients.

Benefits

For You

- Gain a solid understanding of Fintech and digital finance trends.
- Learn to assess emerging technologies and integrate them into business models.
- Develop a strategic vision of innovation in financial services.
- Join a high-impact network of Fintech professionals through HEC Liège alumni and the LHoFT ecosystem.

For Your Organisation

- Empower internal talent to lead digital transformation projects.
- Anticipate technological and regulatory disruption in financial services.
- Identify new opportunities in blockchain, big data and AI technologies and their applications in finance.
- Connect with the local and international Fintech community through the LHoFT.

Who Should Attend

- Professionals seeking to better identify and seize opportunities at the intersection of technology and finance.
- Individuals aiming to develop concrete use cases that combine tech and finance for immediate application in their day-to-day professional activities.
- Entrepreneurs already involved in a fintech venture—or actively exploring one—who are looking to access clients, investors, and integrate into Luxembourg's fintech ecosystem.
- Aspiring professionals looking to break into the fintech industry or transition into related tech-finance sectors.

At a Glance

About Us

HEC Liège, the Management School of the University of Liège, is a world-class business school recognised for both academic rigour and real-world impact. It holds the prestigious Double Crown accreditation (EQUIS & AACSB) — a distinction achieved by less than 1% of business schools worldwide, placing it among the global elite.

Its DNA is built on four pillars:

a solid academic culture | **a pronounced entrepreneurial spirit** | **an international openness** | **a close-knit community**

With its slogan «We nurture the future,» HEC Liège aims to shape the society of tomorrow through education, research, and civic engagement. Its vision is to become a driving force for sustainable solutions on both local and global scales. Its values – citizenship, inclusiveness, rigor, creativity, ethics, and responsibility – guide its mission to train agile and responsible leaders able to create sustainable value for their organisations and for society.

3 500+

About the LHoFT

The LHoFT Foundation is a public-private sector initiative which aims at driving forward technological innovation to the wider benefit of Luxembourg's financial services industry.

Much more than just an incubator; its role is to build and nurture Luxembourg's Fintech ecosystem. LHoFT aims to extend the ecosystem worldwide by linking up with other leading Fintech hubs around the world and by bringing together and collaborating with domestic and international stakeholders on industry-wide projects, working groups and initiatives.

Antony Martini

Programme Supervisor
Head of Education & Talent Programmes, LHoFT

Today, it is essential to have a good grasp of digital finance, demonstrate intellectual agility, and know how to collaborate between technical and business profiles. Key skills include data mastery, understanding emerging technologies, strategic innovation, and the ability to evaluate or design digital solutions. One of the fundamental focuses of the certificate is also on learning how to adopt blockchain and artificial intelligence technologies, not only on a technical level, but also strategically and organisationally.

LHoFT has partnered with HEC Liège and House of Training to bridge the growing gap between traditional financial skills and the needs of the sector in the face of digital transformation. The aim was to offer a high-quality, internationally certified programme designed for professionals in the Luxembourg financial center.

We have incorporated key topics such as Artificial Intelligence, Blockchain, Big Data, Digital Assets, RegTech, and Go-to-Market strategies. These topics embody the major changes taking place in the financial sector.
